PROFESSIONAL SUMMARY

Security-focused Systems Support Specialist with proven experience in enterprise infrastructure administration and cloud-native security. IAT Level II Certified (CompTIA Security+) with a proven ability to lead high-stakes technical projects and maintain mission-critical availability across distributed Windows and AWS environments. Highly effective at optimizing IT operations through automation, hardening endpoints against emerging threats, and aligning technical strategy with business objectives in high-compliance DoD frameworks.

CERTIFICATIONS

- CompTIA Security+ (DoD 8140/8570.01-M IAT Level II Compliant) – Dec 2024
- AWS Certified Developer – Associate – Oct 2025
- AWS Certified Solutions Architect – Associate – Aug 2025
- ITIL 4 Foundation (IT Service Management) – Aug 2025
- Linux Essentials – Apr 2025
- CompTIA Cloud+ – Mar 2025
- AWS Certified Cloud Practitioner – Feb 2025
- CompTIA Network+ / A+ – 2024

CORE TECHNICAL SKILLS

- Identity & Access: Active Directory (AD), Microsoft Entra ID (Azure AD), MFA (DUO), Conditional Access, Single Sign-On (SSO), Least Privilege Principle.
- Endpoint Management: Microsoft Intune, Workspace ONE, Apple Business Manager, Macrium Reflect, PDQ Deploy/Inventory, System Hardening (STIGs).
- Systems & Networking: Windows Server, Cisco Meraki Firewalls/Switching, VLANs, DNS, DHCP, Harmony SASE VPN, VMware.
- Operations & Tools: JIRA Service Desk (Automation), Confluence (SOP Documentation), PowerShell Scripting, Incident & Problem Management, Change Advisory Board (CAB).

PROFESSIONAL EXPERIENCE

CRS TEMPORARY HOUSING

Help Desk Support Specialist & Systems Administrator | March 2024 – Dec 2025

- Executive Technical Support: Provided dedicated "white-glove" engineering support to the C-Suite (CEO, CFO, and VPs); managed secure hardware configurations and AV infrastructure during critical board meetings.
- Cloud Governance & Optimization: Analyzed AWS infrastructure via Compute Optimizer to identify rightsizing opportunities; implemented cost-containment strategies resulting in a **\$13,000 annualized savings**.

- Cloud Operations & IaC: Developed Infrastructure as Code (Terraform) and Python (Lambda/EventBridge) scripts to automate multi-account resource lifecycle management and improve operational consistency.
- Process Automation: Re-engineered JIRA Service Desk workflows and request schemas; developed automation logic that **reduced manual ticket handling by 95% for the enterprise**.
- Knowledge Engineering: Authored 100+ technical guides and 50+ SOPs in Confluence, successfully **reducing monthly ticket volume from 600+ to 250 (60% reduction)**.
- Vendor & Asset Management: Spearheaded the technical evaluation and deployment of an enterprise Asset Management system (PDQ); negotiated vendor pricing to deliver a **\$60K procurement project \$3,000 under budget**.
- Identity & Access Management: Administered Active Directory and Entra ID for 300+ users; enforced MFA (DUO) and granular access controls following a Zero Trust security model.
- Enterprise Endpoint Management: Managed the secure lifecycle of 450+ Windows and iOS/Android devices using Workspace ONE, Apple Business Manager, and Intune; integrated automated patch management via PDQ.
- Infrastructure Modernization: Led a migration from legacy PXE Boot imaging to a modern Macrium Reflect and Microsoft Intune deployment framework to accelerate device provisioning.

MBPROFESSIONAL SERVICES

Site Reliability Engineer (Consulting) | 2023 – Present

- Enterprise Edge Security: **Administered and secured 50+ web domains** via Cloudflare; implemented DDoS mitigation and Web Application Firewall (WAF) rules to ensure high availability.
- Network Infrastructure: **Managed web-scale infrastructure for 80+ domains**, overseen DNS routing, IPv4/IPv6 configurations, and enterprise SSL/TLS certificate management.

EDUCATION

Bachelor of Science in Cloud and Network Engineering

Western Governors University Expected | Salt Lake City, UT | May 2026

- Relevant Coursework: Cloud Deployment and Operations, Network Reliability and Fault Tolerance, Information Systems Security, Scripting and Automation, Cloud Architecture and Solution Management, and Network Security Foundations.

Associate of Science in Emergency Medical Services

Pacific Union College | Angwin, CA | Aug 2019

ADDITIONAL INFORMATION

- DoD 8140 / DCWF Alignment: Experience maps to: Systems Administration (OM-SYS-001), Network Operations (OM-NET-001), and Cyber Defense Analysis (PR-CDA-001)
